Summary

Software Engineer with experience in **Full-Stack Development, Cloud Computing, and DevOps**. Skilled in **web applications, RESTful APIs, and cloud-based solutions** using **Java, Python, React.js, Next.js, AWS, Docker, CI/CD, and SQL**. Foundation in **Data Structures & Algorithms, System Design, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks**.

Skills

Languages: Java, Python, SQL, JavaScript, C

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, REST APIs, Authentication, Authorization, API Development

Databases: MySQL, MongoDB, Firebase, SQLite

Cloud & DevOps: AWS, Docker, Linux, CI/CD, Git, GitHub, GitHub Actions

Core: Data Structures & Algorithms, System Design, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile, Scalability

Professional Experience

Full Stack Developer Intern – Technohana

Mumbai, MH

May 2025 – Oct 2025

- Designed scalable frontend components and optimized application performance, improving user engagement by **30%** through efficient state management and UI enhancements.
- Built authentication, authorization, and real-time data processing modules, reducing backend response time by **25%** through API and database optimization.
- Collaborated in Agile development environments utilizing Git, CI/CD pipelines, deployment workflows, code reviews, and software engineering best practices.

Organizer – Google Developer Group on Campus AIKTC

Navi Mumbai, MH

Aug 2025 – Present

- Organized large-scale technical workshops, hackathons, and community events focused on software engineering and cloud technologies.
- Managed technical operations, industry collaborations, and event execution, engaging participants from **15+ colleges**.

Projects

CogniDetect – AI-Powered Early Dementia Detection – (GitHub)

Python, OpenCV, React.js, AWS, Firebase

- Architected an AI-powered healthcare platform leveraging machine learning, computer vision, speech analysis, and multimodal data processing for early cognitive impairment prediction.
- Developed predictive risk assessment pipelines integrating eye-tracking, speech recognition, and cognitive evaluation models for real-time dementia risk analysis.
- Deployed scalable cloud infrastructure on AWS EC2 with Firebase authentication and secure healthcare data processing workflows.

PerfectFit – AI Tailoring System – (GitHub)

React.js, Python, OpenCV, TensorFlow, REST APIs

- Developed a computer-vision-driven tailoring platform enabling automated body measurement estimation and personalized clothing recommendations.
- Designed scalable backend architecture, database schemas, and RESTful APIs supporting customer, tailor, and order management workflows.
- Implemented AI-powered measurement extraction using OpenCV and TensorFlow, improving fitting accuracy by **25%**.

Smart Traffic Signal System for Emergency Response – (GitHub)

Python, OpenCV, Node.js, REST APIs, Machine Learning

- Designed an intelligent traffic optimization system utilizing machine learning and computer vision to prioritize emergency vehicles in real time.
- Developed adaptive signal control algorithms for dynamic traffic flow management and congestion reduction.
- Built scalable backend services and API-driven communication modules enabling real-time traffic analytics and decision-making.

Education

University of Mumbai — Anjuman-I-Islam Kalsekar Technical Campus

July 2023 – June 2027

- Bachelor of Engineering (B.E.) in Computer Engineering | **CGPA: 9.215/10** | Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Object-Oriented Programming (OOP), Computer Networks

Certifications & Publications

- Smart Traffic Signal with Emergency Response Optimization** – Published research in **Artificial Intelligence and Machine Learning**, focusing on intelligent traffic management and computer vision ([DOI](#))
- Software Engineering** – NPTEL (SDLC, Agile, System Design)
- IBM Full Stack Software Developer** – Coursera (Full Stack Development, REST APIs, Databases)

Extracurricular Activities & Achievements

- Smart India Hackathon (SIH) 2025 – Runner-Up** for developing an innovative software solution in a national-level competition.
- TechAstra 2.0 – Runner-Up (Project Competition)** demonstrating technical project development and problem-solving skills.
- Participated in **15+ hackathons**, showcasing coding, software development, and continuous learning.
- Google Student Ambassador – 2026**, promoting developer communities, technical events, and collaboration.
