Summary

Aspiring **Software Development Engineer** with hands-on experience in building **scalable, high-performance full-stack applications** and **AI-driven systems**. Proficient in **system design, RESTful APIs, and cloud architectures (AWS)**, with a strong foundation in **Data Structures and Algorithms**. Proven ability to deliver impactful solutions through internships, hackathons, and real-world projects.

Education

University of Mumbai — Anjuman-I-Islam Kalsekar Technical Campus

July 2023 – June 2027

Bachelor of Engineering (B.E.) in Computer Engineering | CGPA: 9.05/10 | Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Object-Oriented Programming (OOP), Computer Networks

Professional Experience

Full Stack Developer – Technohana

Remote | May 2025 – October 2025

Project: Neki Hub – Volunteer-Driven Resource Platform

- Developed and maintained **Neki Hub**, a scalable full-stack platform connecting underserved communities with essential resources including healthcare, legal aid, and emergency services using **RESTful APIs**.
- Engineered and deployed responsive web applications using **React.js, Next.js, and Tailwind CSS**, improving user engagement and accessibility by **30%**.
- Implemented authentication, real-time data processing, and optimized backend services, reducing request processing time by **25%** and improving system efficiency.

Organizer – GDGC (Google Developer Groups on Campus) AIKTC

On-site | August 2025 – Present

- Led large-scale technical events and hackathons in collaboration with Google Developer Groups, promoting software development, innovation, and problem-solving skills.
- Managed cross-functional teams, logistics, sponsorships, and operations, successfully engaging participants from **15+ colleges**.
- Designed and executed workshops and technical challenges, enhancing student learning outcomes and hands-on development experience.

Projects

CogniDetect – AI-Powered Early Dementia Detection – (GitHub)

Python, Machine Learning, OpenCV, React, Firebase, AI

- Developed an AI-based healthcare application using **machine learning, computer vision, and speech analysis** to generate predictive cognitive risk scores.
- Implemented multimodal data processing with cognitive testing, speech recognition, and eye-tracking for real-time dementia assessment, and deployed backend services on **AWS (EC2)** for scalable application performance.

PerfectFit – AI Tailoring System – (GitHub)

Full-Stack Development, Computer Vision, OpenCV, TensorFlow, REST APIs

- Developed a scalable **full-stack web application** using **computer vision** to improve clothing fit accuracy by **25%**.
- Designed **database schema, RESTful APIs, and backend services** for efficient and scalable system architecture.

Smart Traffic Signal System for Emergency Response – (GitHub)

Python, Machine Learning, Computer Vision, Node.js, REST APIs

- Developed an intelligent **traffic management system** using **machine learning and computer vision** for emergency vehicle prioritization.
- Implemented real-time detection and **adaptive signal optimization** with scalable backend using **RESTful APIs**.

Skills

- Programming Languages:** C, Java, Python, R, SQL
- Web Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, TypeScript, Tailwind CSS, Bootstrap
- Core CS:** Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- Tools & Platforms:** Docker, Git, GitHub, GitLab, Postman, CI/CD, REST APIs, AWS (EC2, S3, RDS, IAM), Cloud Computing
- Databases:** MySQL, MongoDB, Firebase, SQLite

Certifications & Publications

- Smart Traffic Signal with Emergency Response Optimization** – Published research in **Artificial Intelligence and Machine Learning**, focusing on intelligent traffic management and computer vision (DOI)
- Software Engineering** – NPTEL (SDLC, Agile, System Design)
- IBM Full Stack Software Developer** – Coursera (Full Stack Development, REST APIs, Databases)

Extracurricular Activities & Achievements

- Smart India Hackathon (SIH) 2025 – Runner-Up** for developing an innovative software solution in a national-level competition
- TechAstra 2.0 – Runner-Up (Project Competition)** demonstrating technical project development and problem-solving skills
- Participated in **15+ hackathons**, showcasing coding, software development, and continuous learning
- Google Student Ambassador – 2026**, promoting developer communities, technical events, and collaboration
