

Aman Antuley

Software Engineer | Full-Stack Developer

Mumbai, Maharashtra | amanantuley3794@gmail.com | +91-9867408609
amanantuley.vercel.app | linkedin.com/in/aman-antuley | github.com/amanantuley

Summary

Computer Engineering student with hands-on experience in **software engineering, full-stack development, backend development, and REST API development** through internships and technical projects. Skilled in **Java, Python, JavaScript, React.js, Node.js, FastAPI, SQL, PostgreSQL, AWS, Docker, and Git**. Strong foundation in **Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design, SDLC, Agile, testing, debugging, and CI/CD**.

Skills

Programming Languages: Java, Python, JavaScript, SQL, C

Frontend Development: React.js, HTML5, CSS3, Bootstrap

Backend Development: Node.js, Express.js, FastAPI, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB, Firebase, SQLite

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Linux, Git, GitHub, GitHub Actions, CI/CD

Software Engineering: Data Structures & Algorithms, OOP, System Design, DBMS, Operating Systems, Computer Networks, SDLC

Professional Experience

Software Developer Intern – Technohana

Mumbai, MH

May 2025 – Oct 2025

- Engineered and optimized production-ready **full-stack web application components for NekiHub**, improving user engagement by **30%** through reusable component architecture, efficient state management, and responsive UI optimization.
- Designed and integrated secure **authentication, authorization, and real-time data processing** workflows, reducing backend response time by **25%** through REST API optimization, database query tuning, and efficient request handling.
- Improved development and release workflows through **Git, CI/CD, automated testing, code reviews, and deployment practices**, contributing to reliable releases and maintainable production code in an Agile environment.

Organizer (Lead) – Google Developer Group on Campus AIKTC

Navi Mumbai, MH

Aug 2025 – Sep 2026

- Led technical initiatives, workshops, hackathons, and developer community events focused on **software development, cloud, and emerging technologies**, driving hands-on technical learning and collaboration.
- Coordinated technical operations, industry collaborations, and end-to-end event execution, engaging students from **15+ colleges** while building a collaborative developer community and promoting practical technology adoption.

Projects

CogniDetect – AI-Powered Early Dementia Detection – (GitHub)

Python, OpenCV, React.js, AWS, Firebase

- Developed a **full-stack healthcare application** integrating backend services, REST APIs, authentication, data processing, and machine learning workflows.
- Built modular data-processing pipelines for speech, eye-tracking, and cognitive assessment data to support real-time risk analysis.
- Deployed application infrastructure on **AWS EC2** with Firebase authentication and secure data-processing workflows.

PerfectFit – AI Tailoring System – (GitHub)

React.js, Python, FastAPI, REST APIs

- Developed a **full-stack application** for customer, tailor, measurement, and order management workflows.
- Designed backend architecture, database schemas, **RESTful APIs, CRUD operations, API validation, and request handling**.
- Implemented AI-powered measurement extraction using OpenCV and TensorFlow, improving fitting accuracy by **25%**.

Smart Traffic Signal System for Emergency Response – (GitHub)

Python, OpenCV, Node.js, REST APIs, Machine Learning

- Designed a traffic optimization system using machine learning and computer vision to prioritize emergency vehicles in real time.
- Developed adaptive signal control algorithms for efficient dynamic traffic flow management and congestion reduction.
- Built scalable backend services and **REST API communication modules** for real-time traffic analytics and decision-making.

Education

University of Mumbai — Anjuman-I-Islam Kalsekar Technical Campus

July 2023 – June 2027

- Bachelor of Engineering (B.E.) in Computer Engineering | **CGPA: 9.22/10** | Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Object-Oriented Programming (OOP), Computer Networks

Certifications & Publications

- Smart Traffic Signal with Emergency Response Optimization** — Research Publication in **Artificial Intelligence, Machine Learning, and Computer Vision**; intelligent traffic management and emergency vehicle prioritization. (DOI)
- Software Engineering** — NPTEL | **SDLC, Agile Methodologies, Software Design**
- IBM Full Stack Software Developer** — Coursera | **Full-Stack Development, REST APIs, Databases**

Extracurricular Activities & Achievements

- Smart India Hackathon (SIH) 2025 – Runner-Up** for developing an innovative software solution in a national-level competition.
- TechAstra 2.0 – Runner-Up (Project Competition)** for demonstrating technical project development and problem-solving skills.
- Participated in **15+ hackathons**, actively developing software solutions across diverse real-world problem domains.
- QSpiders** – Completed industry-oriented training in software development, programming, and technical interview preparation.
- Google Student Ambassador** – Promoted developer technologies and organized technical initiatives.
